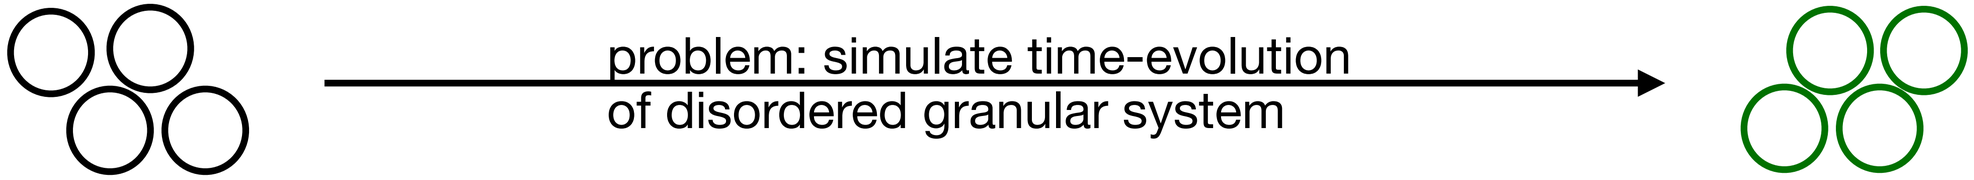
Graph neural network predictions of displacements in sheared granular systems

Towards a machine learning emulator for molecular dynamics

Rowan Orlijan-Rhyne[1,4], Siddhant Ranka[1], Ajay Annamareddy[2], Katharina Vollmayr-Lee[3], Dane Morgan[2], Amy Graves[1]

[1]Swarthmore College; [2]University of Wisconsin, Madison; [3]Bucknell University; [4]Max-Planck Institute for Meteorology


Motivation: leverage machine learning (ML) to save compute
